Pengin RT 3/RW 2 Kelurahan Cangkol, Kecamatan Mojolaban, Kabupaten Sukoharjo

Electronic Engineering Technology student specializing in Embedded Systems, Industrial Automation, IoT, and Control Systems. Experienced in designing and implementing intelligent hardware solutions, including embedded applications, cloud-connected IoT systems, PLC-based automation, and PID control systems. Proven ability to translate complex engineering problems into practical solutions through strong programming, analytical thinking, and system integration skills. Active in robotics research and innovation projects, with leadership experience and international recognition in technology competitions. Currently seeking internship opportunities to further develop technical expertise and contribute to real-world engineering projects.

Jenjang Pendidikan

Politeknik Negeri Semarang - Jl. Prof. Soedarto, Tembalang, Kec. Tembalang, Kota Semarang, Jawa Tengah 50275

Sep 2023 - Sep 2027 (Perkiraan)

S.Tr. Teknologi Rekayasa Elektronika, 3.49/4.00

- Led robotics research and development as Head of KRTMI Division at POLIREVO. Developed projects in IoT, Embedded Systems, Industrial Automation, and Control Systems. Awarded Silver Medal at Indonesia International Invention Expo (IIIE) 2025 and 3rd Place in Polines Electro Expo 2024 for IoT innovation projects. Earned certifications in AI and Machine Learning from Google Cloud and Dicoding.

Pengalaman organisasi

POLIREVO – Polines Robotics Evolution - Politeknik Negeri Semarang

Aug 2025 - Aug 2026

Research & Development Advisor, KRTMI Division

- Provided technical guidance for robotics research and development activities.
- Assisted team members in embedded system design, sensor integration, and control system implementation.
- Supported strategic planning and technical evaluation for competition preparation.

POLIREVO – Polines Robotics Evolution - Politeknik Negeri Semarang

Aug 2024 - Aug 2025

Programmer, KRTMI Division

- Developed embedded software and control algorithms for autonomous robot operation.
- Programmed navigation and movement logic using microcontroller-based systems.
- Conducted debugging, parameter tuning, and performance validation during development and testing stages.
- Collaborated with mechanical and electrical teams to achieve reliable robot system integration.

POLIREVO – Polines Robotics Evolution - Politeknik Negeri Semarang

Aug 2024 - Aug 2025

Head of KRTMI Division

- Led the research and development process of thematic robots for the Indonesian Robot Contest (KRTMI).
- Coordinated a multidisciplinary team in software, electronics, and mechanical system development.
- Managed project planning, technical discussions, task allocation, and system integration activities.
- Oversaw robot testing, troubleshooting, and performance optimization to meet competition requirements.
- Strengthened leadership, project management, and engineering decision-making skills.

Keterampilan, Prestasi & pengalaman lain

- Hard Skills:** PLC Programming, C/C++, Python, Basic Web Development, Robotics, Embedded Systems, IoT, PID Control, Industrial Automation.
- Soft Skills:** Analytical Thinking, Problem Solving, Programming Logic, Leadership, Teamwork.
- Project Experience (2024):** IoT Development, Embedded Systems, Automation Projects, Robotics Development, System Integration.
- Achievements** : Silver Medal IIIE 2025, 3rd Place Polines Electro Expo 2024.
