Professional Summary

Electronic Engineering Technology student specializing in Embedded Systems, Industrial Automation, Internet of Things (IoT), and Control Systems. Experienced in developing microcontroller-based solutions using ESP32, Arduino, PLC, C/C++, and Python. Proven leadership in robotics research and development through POLIREVO and recognized internationally with a Silver Medal at Indonesia International Invention Expo (IIEX) 2025. Seeking internship opportunities in Automation, Embedded Systems, IoT, and Instrumentation Engineering.

Technical Skills

Programming: C/C++, Python, JavaScript (Basic), PLC Programming
Embedded Systems: ESP32, ESP8266, Arduino Uno/Nano, Raspberry Pi
Automation & Control: PID Control, Industrial Automation, Instrumentation, Mitsubishi Servo Systems, Control Engineering
IoT & Communication: MQTT, REST API, Firebase Realtime Database, Blynk IoT, WhatsApp API
Engineering Tools: MATLAB Simulink, VS Code, Arduino IDE, EasyEDA, Proteus, Git, GitHub

Project Experience

Post-Stroke Smart Hand Gloves (IoT-Based) 2024–2025

- Developed an IoT-enabled rehabilitation glove using ESP32-S3 with cloud-based monitoring.
- Designed an LVGL touchscreen interface and integrated database storage with WhatsApp API notifications.
- Awarded Silver Medal at Indonesia International Invention Expo (IIEX) 2025.

AC Servo Trainer Kit Reconditioning (Mitsubishi MR-J2S-10A) 2026

- Reconditioned and configured an industrial AC servo trainer kit for laboratory applications.
- Performed wiring, parameter setup, troubleshooting, and performance validation.

Water Level Control System Using PID 2025

- Developed a PID-based water level control system using Arduino Uno and MATLAB Simulink.
- Integrated VL6180X sensors for real-time feedback and stable control performance.

Automated Poultry Farm Monitoring System 2025

- Developed an IoT monitoring and PID control system for temperature and humidity regulation.
- Implemented cloud connectivity for real-time environmental monitoring and automation.

Leadership Experience

POLIREVO – Polines Robotics Evolution Semarang, Indonesia
Research & Development Advisor, KRTMI Division Aug 2025–Present

- Provide technical guidance in robotics development, embedded systems, and sensor integration.

Head of KRTMI Division Aug 2024–Aug 2025

- Led research and development activities for the Indonesian Robot Contest (KRTMI).
- Coordinated multidisciplinary teams in software, electronics, and mechanical integration.

Programmer, KRTMI Division Mar 2024–Aug 2025

- Developed autonomous navigation algorithms and robot control systems.
- Conducted debugging, testing, and control parameter optimization.

Education

Politeknik Negeri Semarang Semarang, Indonesia
S.Tr. Teknologi Rekayasa Elektronika
Sep 2023–Expected Sep 2027
GPA: 3.47/4.00
Relevant Coursework: Digital Control Systems, Microcontrollers, Programming, Electrical Circuits, Mechatronics, Industrial Automation

Awards & Certifications

- Silver Medal, Indonesia International Invention Expo (IIIEX), IoT & Health Technology Category (2025)
- 3rd Place, Polines Elektro Expo, IoT Innovation Category (2024)
- Google Cloud Skills Boost: Generative AI, Machine Learning, Cloud Infrastructure, and Security (2026)
- Belajar Dasar AI – Dicoding
